If life is a web of coincidences, feelings, emotions often conflicting, how could art not to be an expression of differences, new groups and unions unexpected? The felt pen drawing, typical of children's creativity, brings us to another peculiarity of Letizia Cortini, to turn the world joyful and carefree children. The spontaneity, sincerity in the expression of feelings and the freshness of the world of children is what most attracts the artist, and better able to bring in his works. The sense of wonder in the life of every day, to know how to move in a different way, ...

From markers ... to dripping on the clouds of plastic. In the latter production, central and innovative element is the presence of the light that passes through the plastic supports ... The effect produced has a large charge communicative and, if on the one hand highlights the given material of painting, its physical structure, on the other hand gives the pigments a sort of lightness that makes them apparently independent from the support, endowed with their expressive autonomy. The color seems to float, as if still leaking on the media and was destined to expand further, taking on different forms always.
